Test Questions

Question	Top Source	Returned Context
Refund policy?	company_policy.txt	Returns are handled through the support policy section.
Support response time?	company_policy.txt	The answer includes the matching support-policy chunk.
Escalation path?	company_policy.txt	The answer cites the relevant operations section.

Delivered Files

- Document loader for .txt and .pdf
- Local vector store with chunk metadata
- CLI commands for ingest and chat
- FastAPI /ask and /health endpoints
- Tests that run without external API calls

Scope Notes

- This template retrieves evidence; it does not promise perfect answers.
- Production deployments should add authentication, refresh jobs, monitoring, and a hosted vector database when needed.
